

URPP Human Reproduction Reloaded | H2R

Changing Human Reproduction

Chance – Choice – Design

Human reproduction is undergoing a profound transformation—evolving from a matter of chance to a matter of choice, and now, to a matter of design. Driven by the rapid advancement of reproductive technologies, these changes challenge our traditional understanding of family and biology.

The **University Research Priority Program (URPP)** "**Human Reproduction Reloaded | H2R**" explores these new frontiers. We investigate the opportunities, risks, and limitations of emerging technologies, including: assisted reproduction and gamete donation, egg freezing, and gene editing.

The URPP H2R is a transdisciplinary powerhouse, uniting researchers from six faculties across the humanities, social, medical, and natural sciences to examine the societal, ethical, and legal implications of "reloading" reproduction.

Six Faculties. One Transdisciplinary Mission. The Future of Reproduction.

SUB-PROJECTS

SP 1: Normativity of Human Reproduction

Prof. Dr. Alice Margaria
alice.margaria@ius.uzh.ch

Prof. Dr. Thomas Gächter
thomas.gaechter@rwi.uzh.ch

SP 2: Human Reproduction in Societies and Markets

Prof. Dr. Katja Rost
rost@soziologie.uzh.ch

Prof. Dr. Marco Giesselmann
giesselmann@soziologie.uzh.ch

SP 3: Ethnography of Human Reproduction and Single Case Studies in Threshold Areas

Prof. Dr. Tanja Krones
tanja.krones@usz.ch

Prof. Dr. Annuska Derks
annuska.derks@uzh.ch

SP 4: CRISPR Technology in Human Reproduction

Prof. Dr. Brigitte Leeners
brigitte.leeners@usz.ch

Prof. Dr. Gerald Schwank
schwank@pharma.uzh.ch

Empirical and Normative Knowledge and Data Centre
